

Deva™ Industrial Floor Matting

Deva™ is a heavy-duty industrial anti-slip roll made from high-density PVC for factory aisles, pallet and container platforms, tool drawers, and special vehicle maintenance areas. Its embossed steel-plate surface improves traction, while multiple widths, color options, and optional anti-static performance support more specialized operating environments.

Steel-Plate Surface Pattern for Reliable Slip Resistance

The embossed steel-plate pattern provides good wear-resistant anti-slip performance for industrial walkways, especially in areas exposed to moisture, grease, or coolant. It is well suited to production lines, maintenance paths, and service zones where stable footing is required.

Flexible Configuration with ESD Option and Multiple Widths

Deva™ is available in several widths and surface color options, including high-visibility yellow-black and five-stripe variants. It can also be customized for anti-static performance, making it suitable for specialized technical zones that require both underfoot safety and electrostatic control.

Technical Specification

Thickness	2 mm (0.08") / 3 mm (0.12")
Surface Resistance	10^6–10^9 Ω
Color	Green
Hardness	80 ± 5 Shore A
Sheet Sizes	100 × 100 cm (39.37" × 39.37") 120 × 100 cm (47.24" × 39.37") 100 × 1000 cm (39.37" × 393.70")
Roll Widths	0.6 / 0.8 / 1.0 / 1.2 m (1.97' / 2.62' / 3.28' / 3.94')
Roll Length	10 m (32.81')
Weight	3 ± 0.3 kg/m² (0.61 ± 0.06 lb/ft²) 4.5 ± 0.3 kg/m² (0.92 ± 0.06 lb/ft²)

Suitable Applications

Factory aisles, pallet and container anti-slip areas, tool drawers, special vehicle maintenance zones, and other industrial spaces that require durable underfoot traction.

Cleaning & Maintenance

Scrub with a neutral pH 7 cleaner and allow the matting to dry naturally in a cool, ventilated area.

Available Color

Black Grey Yellow-Black Five-Stripe Custom
