PAALER® *Better mat · Better floor*

Stria III Scraper & Dirt Control Matting

Covered Outdoor Area | Indoor Entrance Area

Stria III features a ribbed 3D surface that scrapes coarse dirt first, then absorbs moisture and fine particles to reduce tracking at entrances. Designed for large installations in high-traffic commercial lobbies and transition zones, it keeps floors drier, safer, and easier to maintain.

The 3D ribbed surface improves friction and channeling

Scraping off dust and grit while absorbing moisture and retaining soil, keeping entrances drier and safer.

Thicker and more comfortable underfoot

The high-density build resists heavy foot traffic and compression, helping maintain performance in long-term, high-traffic use.

Technical Specification

Construction	Needle-Punched Triple-Rib Pile
Carpet Material	PET
Backing	Anti-UV PVC Backing
Pile Height	7.5mm
Roll Size	1.2m × 15m, 1.8m × 15m
Pile Weight	1100g/m²
Total Height	9.5mm
Total Weight	4800g/ m²
Dyeing Technology	Solution dyeing
