PANLER® *Better mat·Better floor*

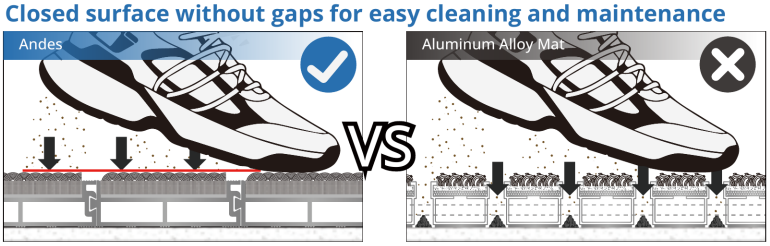
WORKSITE solutions

Andes™ Aluminum Entrance Matting System

R12 Slip Resistance | B1 Fire Resistance | 5 Warranty | Easy Install | Wheeled Traffic | CNIPA | Works with WELL

Seamless interlocking aluminum profiles create a closed surface that prevents dust accumulation and allows easy cleaning. The wide-strip design delivers a clean, architectural appearance suitable for premium entrances.

Closed surface without gaps for easy cleaning and maintenance



Dust and debris remain on the mat surface, allowing quick and efficient daily cleaning.

In conventional aluminum entrance mats, dust easily falls into gaps and is difficult to remove.

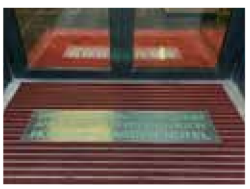
50% Improvement In Installation Efficiency

40% Improvement In Dust Removal Performance

Single Strip Width

Closed surface without gaps for easy cleaning and maintenance

① Stainless Steel Inlay ② Surface Carpet Inlay ③ Colorful Illumination



More novel logo display, providing more diversified brand display methods, in line with different design styles and needs.

Technical Specification

Product Size	0.98*0.40 m, 1.53*0.40 m, 2.10*0.50m
Aluminum Material	6063-T5 Al Mg Si Alloy
Wall Thickness	1.5 mm (0.06")
Aluminum Height	16 mm (0.63")
Profile Assembly Width	50 mm (1.97")
Total Height	19 mm (0.75")
Dynamic load	2 wheels 80mm, 20,000 passes of 200 kg
Product Structure	Interlocking male-and-female profiles create a tight, gap-free surface that helps prevent dust from falling into the mat well and makes cleaning and maintenance easier.
Bottom	Wear-resistant acoustic foam backing provides cushioning, vibration reduction, and effective noise dampening.
Fire Resistance	GB 8624-2012: B1
Slip Resistance	DIN 51130:2014: R12
Patent & Certification	CNIPA; Works with WELL

Suitable Applications

Ideal for premium commercial entrances and certification-driven projects that require a clean architectural appearance, easy maintenance, and recognized material performance, including WELL-oriented office buildings, corporate headquarters, hotels, shopping malls, airports, and other high-traffic public entrances.
