Aluminium Finishing Trim

Used to form a neat and clean finish to the edge of a floorcovering where it either finishes or meets another floorcovering. Protects the edge of floorcoverings, prevents damage and ensures that the floorcovering does not lift and become a trip hazard.

ACT61 carpet to stone floor.

Key

Solid base for straights.

Threshold Trims

Used to join floorcoverings of the same height usually at door or room thresholds. Typically used at door interfaces or to define changes in area.

TH382 carpet to vinyl.

Key

Solid base with countersunk holes for straights.

TH382 and TH383 - the top section should be lightly dressed down using a rubber mallet after installation to ensure a tight fit to edges of both floorcoverings.

Multi-Purpose Trim

A range of profiles used to join and edge a variety of floorcoverings of heights from 4.5mm to 15mm. Three options available: pre-punched with tabs and fixing holes for on-site curving; solid base for straights; and perforated with fixing holes for straights and for use with ceramics. Can be used as a recessed matwell frame.

Key

Pre-punched with tabs and fixing holes for on-site curving.

ETR305F0

Ramp Edge - Aluminium

Used to join floorcoverings such as carpet or resilient flooring to flooring of a lower height, e.g. stone, concrete or resilient.

Key

Solid base with countersunk holes for straights.

RT264

Clip-Top™

A two-piece product allowing design flexibility in commercial applications. The tops can be replaced so that the colour can be altered as part of a refurbishment programme, or if a worn or damaged section needs to be changed, without renewing the base or disrupting the fitted floorcovering.
